Nekeas

Nekeas is a blend of history and modernity thanks to the initiative of a set of families deeply rooted in their land and a good management team, Francisco San Martín as founder and Chairman, Manuel Urricelqui as Technical Head-General Manager and Concha Vecino as Oenologist, all linked with the project from the outset.

Vinification

The olives are harvested mechanically at an extraction temperature of 24 degrees. This olive oil consists of 100% Arbequina olives.
